SDC Hackathon 2026 | Domain 1: AIVERSECITY

NAVIGATING CAREER RESILIENCE IN THE AI ERA || NULLTEAM

FUTURE-READY WORKFORCE AI

KEY VISUAL OF OUR PROJECT :

A clean, abstract vector graphic representing career pathways or technological growth.

MUQRI

STATISTIC OF WORKERS IN MALAYSIA

PROBLEM CONTEXT

THE AI DISRUPTION

AI is displacing routine, rules-based roles while creating demand for new AI-adjacent occupations.

THE VULNERABILITY

Working adults in administrative roles, fresh graduates, and HR teams lack lightweight, scenario-aware tools to map current skills to resilient roles.

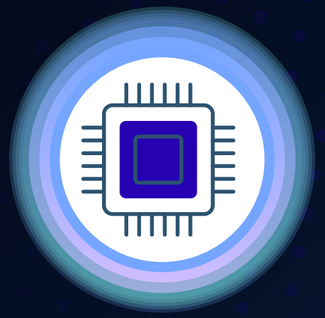

THE DATA

56% of roles face meaningful disruption exposure, while only 26% of workers are on clearly growing pathways.

THE RISK

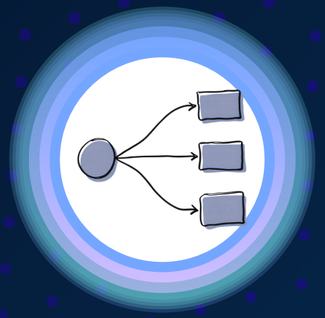

Without intervention, economic inequality and the skills mismatch will widen.

SOLUTION SOLVED

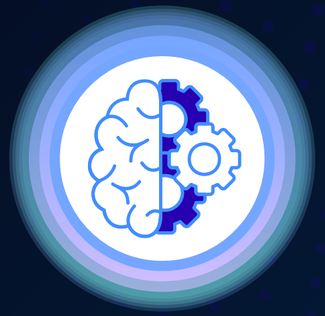

CORE CONCEPT

A dynamic web platform guiding users from their current skill sets to AI-era readiness

SCENARIO-AWARE

Models multiple disruption scenarios (Moderate vs. Rapid AI Disruption) to stress-test career recommendations.

TRANSPARENT & UNBIASED

Core matching relies on explainable, local rule-based TypeScript logic, avoiding automated hiring bias.

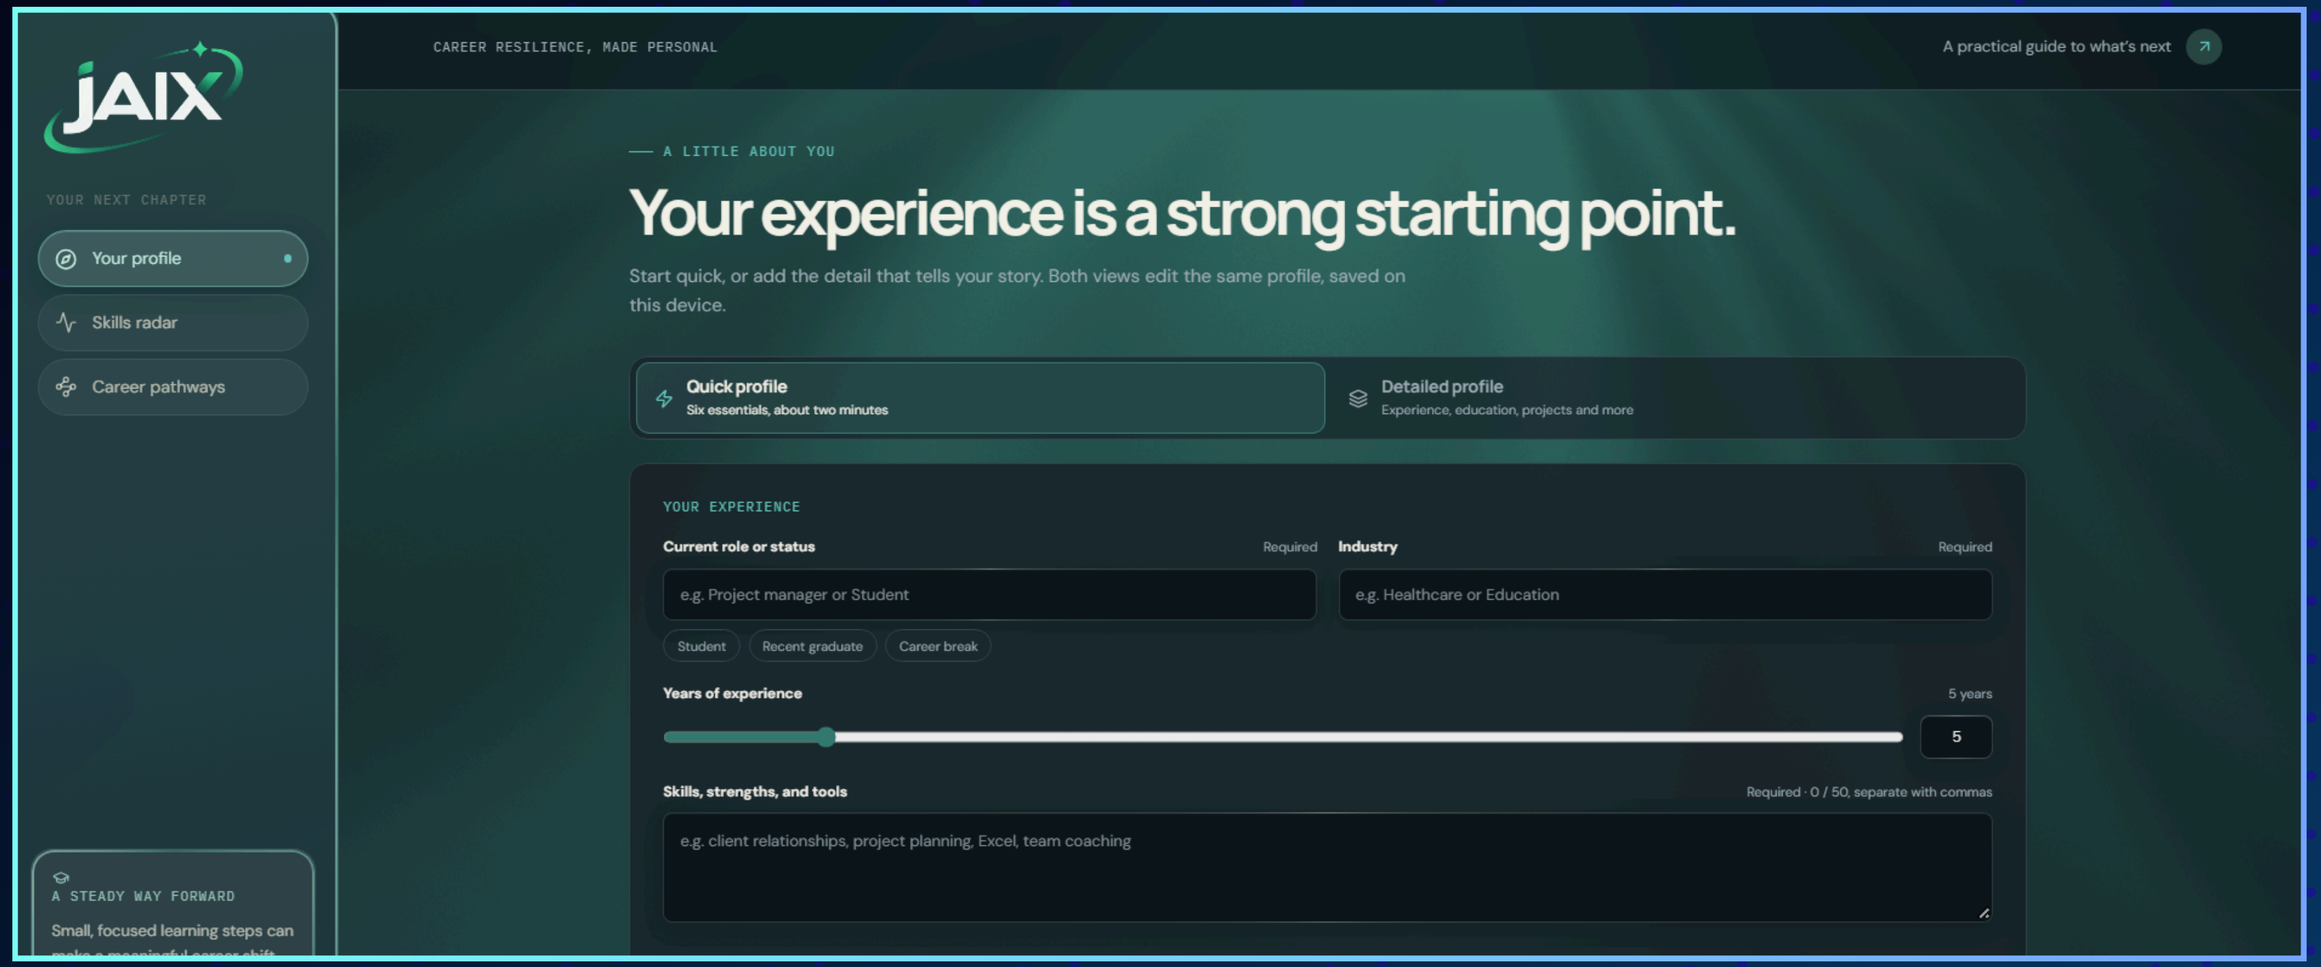

SDG ALIGNMENT

Directly maps every skill and career path to UN SDGs 4 (Quality Education) and 8 (Decent Work and Economic Growth).

JAIX || NULLTEAM

FRONT PAGE OF OUR WEB

THE 4-STEP USER JOURNEY

1. INTAKE

Users input their current skills and background.

2. TREND RADAR

Surfaces role growth outlooks and disruption risks using ingested dataset insights

3. ROLE MATCHING

Applies explainable, rule-based skill-fit scoring to rank compatible future roles and identify skill gaps.

4. RESKILLING PATHWAYS

Generates ordered learning roadmaps utilizing free online courses and accredited programs.

TECHNICAL ARCHITECTURE

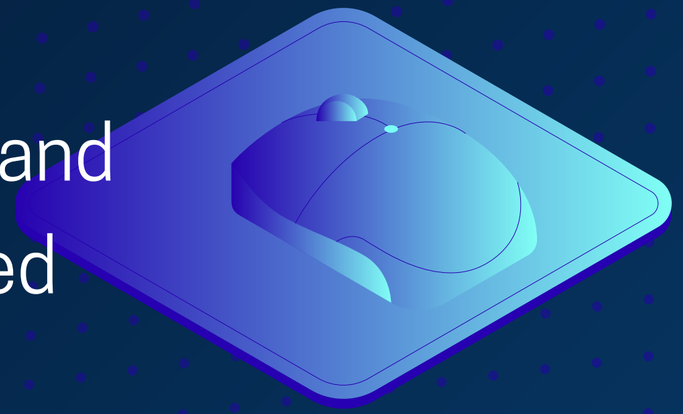

FRONTEND

React, Vite, and Tailwind CSS. Utilizes PDF.js and Mammoth for secure, in-browser resume text extraction.

BACKEND

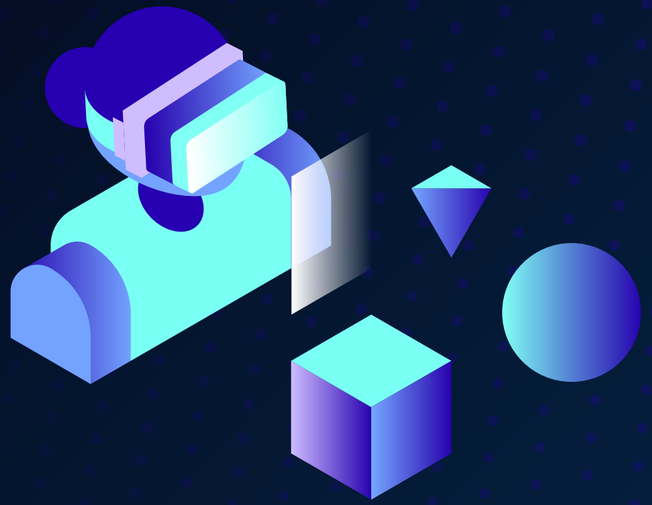

TypeScript / Express API routing. Profiles and career pathways are stored in a file-backed SQLite database.

AI INTEGRATION

RunPod serverless GPU compute hosting the Qwen/Qwen2.5-7B-Instruct model, specifically utilized to parse extracted CV text into strict JSON

EXTERNAL API

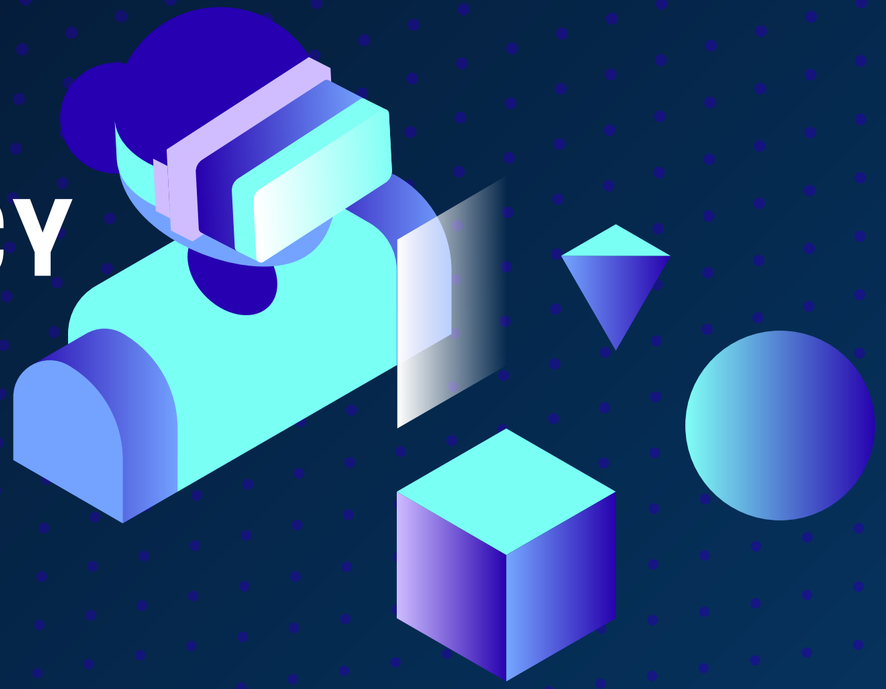

Google News RSS powers the live AI trend signal layer, supported by Unsplash CDN for fallback placeholder images

CLOUD DEPLOYMENT

FULL-STACK APPLICATION HOSTED ON REPLIT, INTEGRATED SEAMLESSLY WITH RUNPOD FOR ML INFERENCE.

DATA PRIVACY & TRANSPARENCY

CAREER MATCHING RELIES STRICTLY ON DETERMINISTIC RULES RATHER THAN AI. THE SQLITE DATABASE RESETS UPON SERVER RESTARTS, ENSURING ONLY TEMPORARY RETENTION OF PII FROM UPLOADED RESUMES.

UPLOAD YOUR CV TO START

Upload CV / Resume to Auto-Fill

Choose a PDF, DOCX, or TXT file. Extracted text is sent to our AI service to identify profile details.

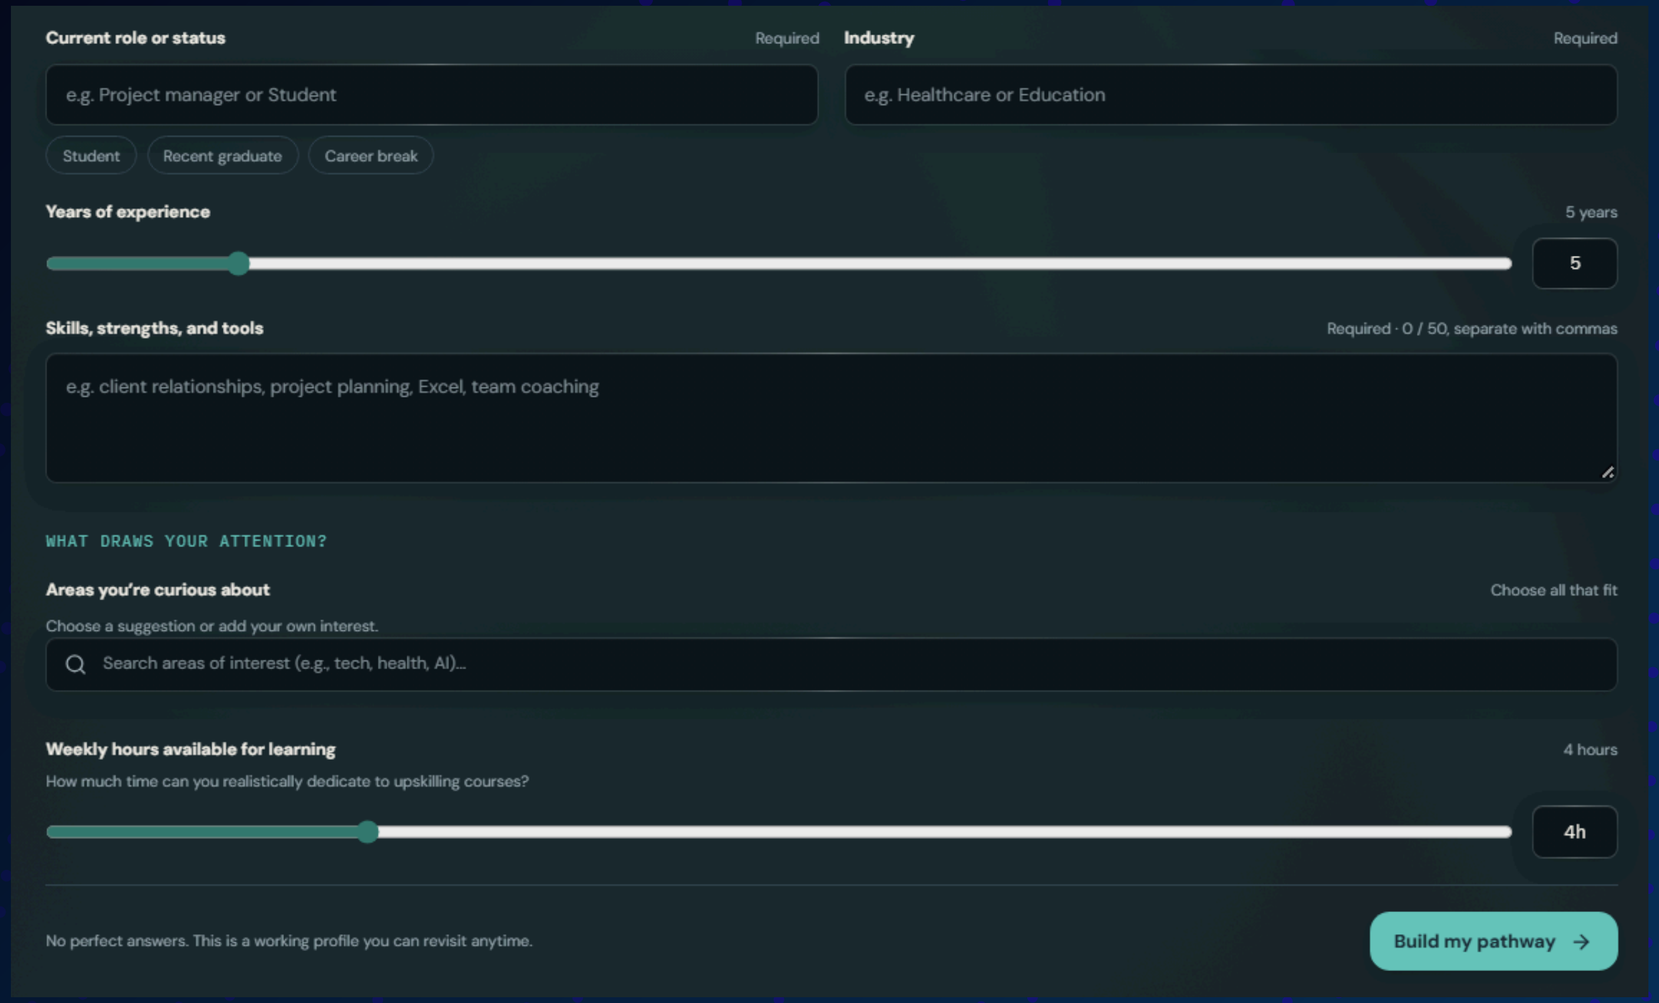

CURRICULUM VITAE INSERTION

the AI only extracts text from the CV for the "Intake" step, but the actual Role Matching is done locally and rule-based via TypeScript to maintain transparency.

FEATURES

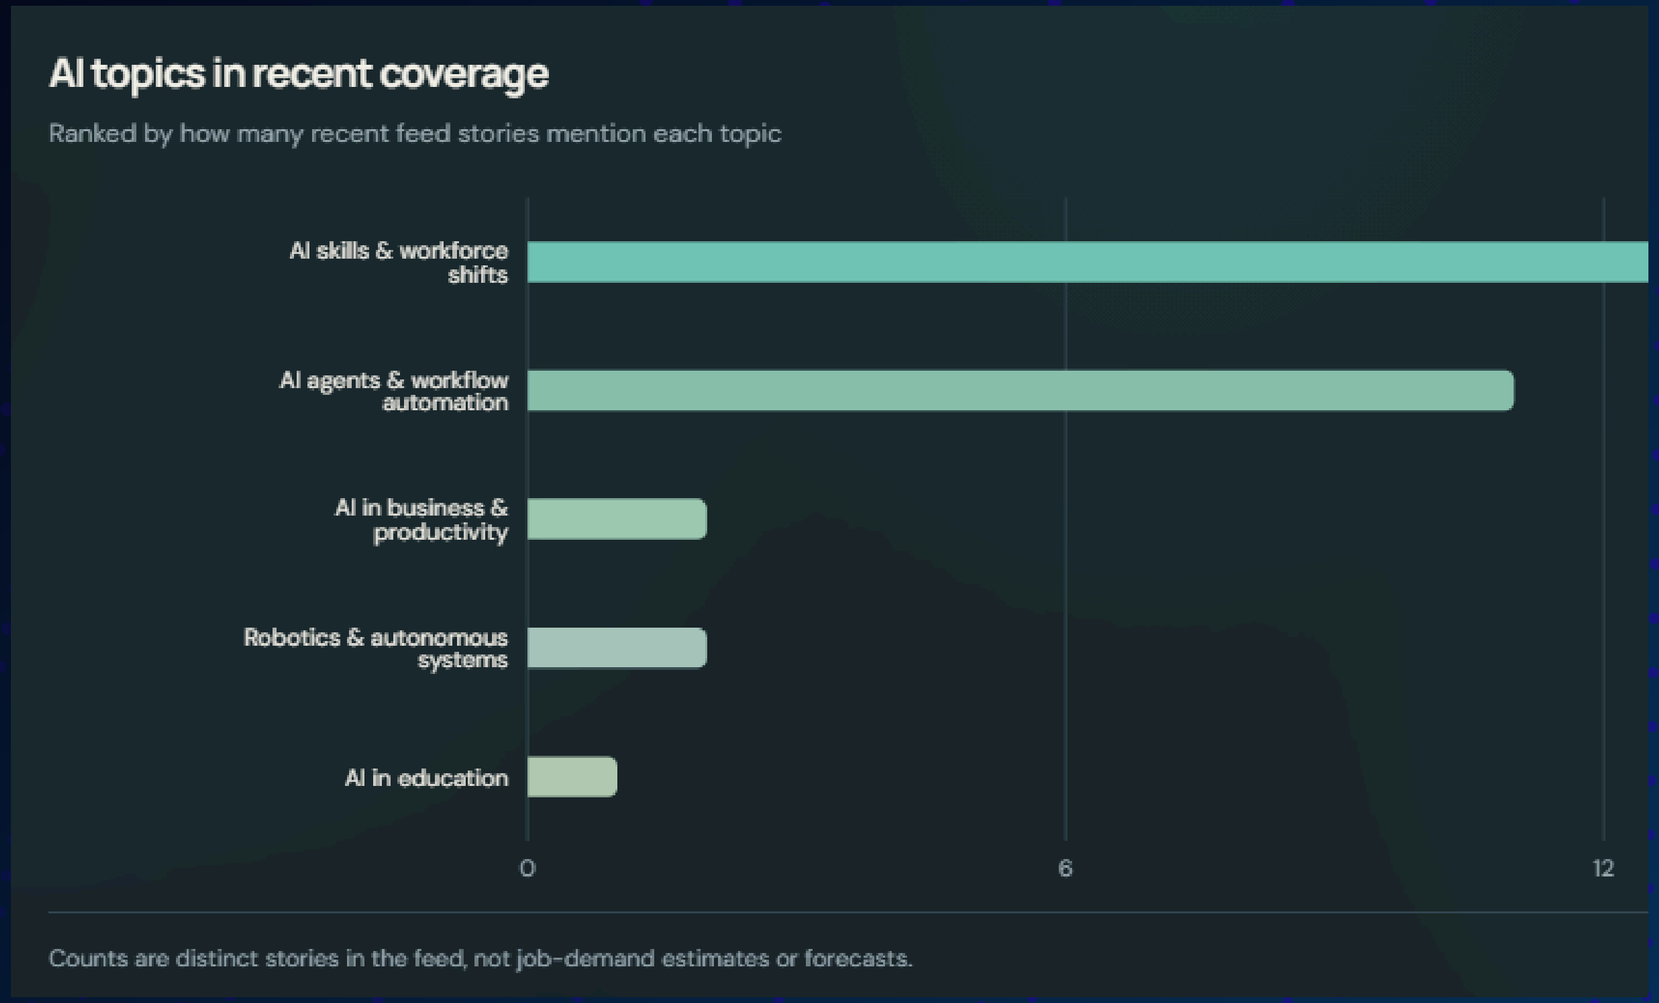

PROFILE

A feature to fill in your information such as roles and etc in order for the website to find the best pathway.

SKILL RADAR

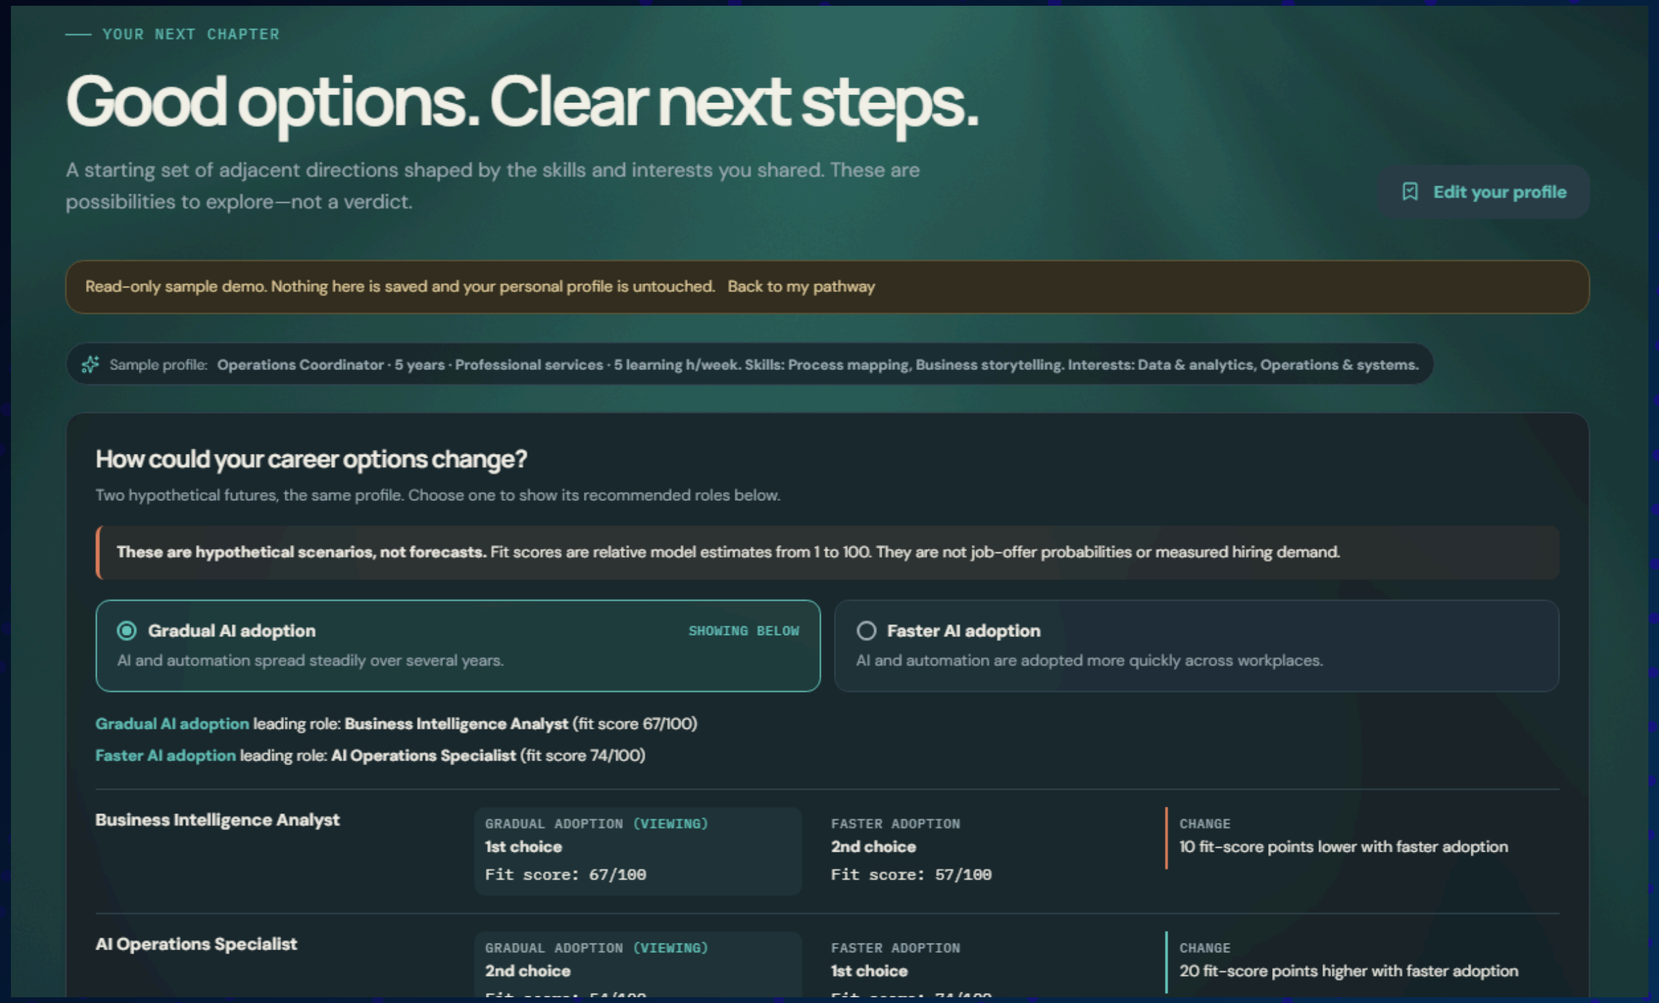

JAIX || NULLTEAM

A platform to connect your strengths to realistic next steps

CAREER PATHWAY

JAIX || NULLTEAM

A clear steps for starting set of adjacent directions shaped by the skills and interests you shared

DEVELOPMENT & DEPLOYMENT WORKFLOW

CLOUD-NATIVE FOUNDATION

Replit served as the core cloud-based IDE, enabling seamless real-time team collaboration without local environment discrepancies.

AUTOMATED ENVIRONMENTS

The .replit configuration standardized our setup (Node.js 24) and managed parallel workflow execution for our monorepo.

INTEGRATED TESTING

Enabled rapid, simultaneous iteration on both the React frontend and Express backend within a unified sandbox.

LIVE DEPLOYMENT

Replit’s hosting platform reliably serves the functional MVP for demonstration.

IMPACT, KPIS, AND FUTURE GOALS

Current Baseline

600,000+ Malaysian workers require urgent reskilling; 74% lack formal AI training.

Core KPI

Measure the average time to generate a verified, SDG-mapped reskilling pathway.

IMPACT, KPIS, AND FUTURE GOALS

Quality Metric

Percentage of recommended courses verified against accredited frameworks.

Phase 2 Target

Guide target learners onto verified reskilling pathways with 100% SDG mapping transparency. Also, its aubstantially increase the number of youth and adults with relevant skills for employment and entrepreneurship.

FUTURE-READY WORKFORCE AI

THE END
